# Cansel Ceviz

Toronto, Ontario | canselceviz@gmail.com | (416) 8796126 | [www.canselceviz.com](http://www.canselceviz.com)

## PROFFESSIONAL SUMMARY

- Experienced Architect and BIM Specialist with over three years of expertise in infrastructure and metro projects. Demonstrated proficiency in Building Information Modeling (BIM) and project coordination, complemented by 5+ years of experience training professionals in Revit software.
- Proficient use of: Navisworks, Revit, AutoCAD, Sketchup, Adobe Creative Tools, Rhino, Lumion, as well as MS office software applications.
- Experience in project management, preparation of budget documentation, organization of team presentations, able to work independently or as part of a team.

## WORK EXPERIENCE

**Architect**                                                              **2024**
Arcnova Inc.                                                    Toronto, Canada

- Led coordination efforts for the Custom House project worth 7K $,  ensuring seamless collaboration across disciplines.
- A project-specific detail solution was developed and implemented

**Site Coordination Architect**                                            **2023**
SML Construction                                              Istanbul, Türkiye

- Liaise closely with the Structural and M&E Coordinators
- Ensured buildable shop drawings are issued timely to the project site team.
- Created and calculated estimated cost budgets for the project an average of ten times in total, as necessary when updates were added to the project.

**BIM/VDC Railway Architect**                                              **2020**
Prota Engineering                                            Istanbul, Türkiye

- Gebze – Darıca Metro Line Project executed by BIM ( Building Information Modeling) – Revit
- Produced a model, time schedule, and 4D simulation to present to team managers with team coordinator.
- Produced structural and architectural project drawings in Revit, 4D simulation, clash detection as well as quantification in Navisworks.
- Created visual progress reports of the stations for the consultants of the project
- Produced of BIM execution plan for the project
- The metro interior architecture that I designed, drew and coordinated was implemented.
- Led and coordinated BIM processes across metro infrastructure projects, improving design accuracy by 20% through streamlined workflows.
- Worked collaboratively across departments to implement BIM standards, leading to a 30% increase in project efficiency.

**Architectural Designer**                                                **2018**

SP Design Office                                                  Istanbul, Türkiye

- Produced Plan Solutions, Facade Design
- Mass Design, Area Calculations, Schematic Design
- Design Development
- Created Construction Drawings, 1/20 System Details, 1/5 Details,
- Revit Family Production, Revit Detail Models, Revit Coordination, Office BIM Library and Standards
- Conducted Design Development via Wacom Cintiq Pro Digital Tablet and Hand Drawing

**Revit Instructor**                                                      **2016**

Uretimhane                                                       Istanbul, Türkiye

- Provided individual and group lessons to professionals, delivering Revit training to companies and individuals for over 7 years during student years
- Trained and mentored over 100 professionals in Revit and BIM tools, raising team-wide competency levels and reducing design errors.

---

## EDUCATION

**BArch in Architecture ( Double Major )**                            **2013-2019**

Mimar Sinan Fine Arts University                                  Istanbul, Türkiye

**BArch in Urban and Regional Planning**                              **2012-2019**

Completed First in Faculty in 2012, demonstrating exceptional academic    Istanbul, Türkiye
and project performance.

Mimar Sinan Fine Arts University

## CERTIFICATIONS

- **Revit and Navisworks for BIM Users Certificate**
- **Autodesk Revit Certified Professional**

---

## SKILLS

- **Technical Skills:** BIM Coordination, Revit, AutoCAD, Navisworks, Dynamo, 3D Modeling, Project Lifecycle Management
- **Soft Skills:** Project Leadership, Client Communication, Training & Development, Cross-Functional Collaboration, Problem-Solving, Design, Creativity
